

## Who should attend?

- We welcome individuals and teams of educators representing district or school. The optimal team includes classroom teachers representing different grade levels, specialists and support staff, supporting principals, and key active parents.
- Educators looking for strategies to incorporate the natural world into student projects and develop project based learning management skills.
- All who would like to become a student again and experience project based learning first hand.

- Possibility of University Credit
- Institute can meet standards for PI 33 professional development plans
- Educator scholarships available

# 2010 Environmental Project Based Learning Institute

## Format

- 3 day immersion in project based teaching and learning strategies;
- Elementary, Middle School, and High School teams;
- Develop your own projects to implement back in your school or classroom.
- Leave with an action plan and resources for school use;
- Participate as a student in outdoor project based learning led by experienced teacher from across the state;
- Teacher leaders from all grade levels;
- An outstanding faculty which with veteran classroom teachers who use every strategy they teach;
- Consistent modeling of exemplary teaching strategies, ensuring that we practice (and demonstrate) what we preach;
- Small workshop enrollments, allowing personal contact among all participants and faculty;
- Diverse kindergarten through high school peer groups, working partly together and partly at our own grade levels so can all share our experiences;
- Develop practical, concrete projects for our own classrooms, as well as ideas for cooperative action across grades, schools, and whole districts;
- A spirit of hard work and serious fun, delighting in the challenge of teaching and the joy of our collegueship.

## Facilities

- On-site lodging and meals included
- Cabins, showers, dining hall nestled in beautiful Eau Claire County forest next to creeks, wetlands, and rivers.
- Fully equipped charter science school lab, classroom, and computer facilities. High tech data collection systems, GPS, and geographic information systems technology all on hand.
